"What shows through this exemplary study is the life blood of a people and their nation."—*Bernard Berelson, from the Foreword*

## The Population of Israel

**Dov Friedlander and Calvin Goldscheider**

The authors, Israeli professors, examine one of the dominant themes in the social and political development of Israeli society: the relationship between population growth and policies in Palestine and Israel. Their study reveals that population growth has been one of the main goals of Zionist nationalism and that it was, and still is, essential for the survival of the state. With over 40 tables of population statistics, this comprehensive study "makes an interesting contribution to a broader understanding of both past developments and future policies."—*Library Journal*
